To: Mayor
From: Buddy Zimmerman
Public Works Director
Re: Monthly Report – Council Meeting

Highlights:

The Public Works crews are continuing improvements on St. John St. drainage. There are still a few problems, when we finish repairing the concrete driveways on the highway end of the 500 block, we will be assessing the problems and needs of the remainder of the block.

Our Department has also been spreading limestone and gravel in Wards 5 and 6. This past month we have spread 80 tons on limestone and 70 tons of gravel and graded miles of roadways. The rainy weather has hampered the progress of the road maintenance crew, but they will continue plugging away on all our problems areas.

Our crews have also constructed and installed the new flag pole at the Fire Station 2. The stars and stripes will soon be flying high on Hwy 603.

We have also completed our Annual Water System Inspection. We came out of the inspection with an excellent capacity assessment rating of 4.7 out of a possible 5.
